De-risk your Cloud Adoption.

Navigate the challenges of your cloud enablement while ensuring the compliance and integrity of your cloud platform and data.

Previous Outcomes.

- Delivered a security controls assessment and roadmap to support the successful launch of a Public Cloud platform for a UK & international bank

- Developed a strategy to move 6000+ applications to the cloud, accelerating secure cloud migration

- Reduced risk for a UK bank by introducing infrastructure as code and automation, enabling safe yet fast production deployments

Do these challenges sound familiar?

De-risking your cloud migration
You've convinced your stakeholders of the benefits of moving to the cloud, but there's still concern about how you minimise risk on your cloud journey.

Embedding security into your environment
The cloud can bring a diverse range of threats to your business. Ensuring your architecture and operations are secure and fit for purpose throughout your cloud adoption is critical to success.

Ensuring data transparency, visibility and control at all times
Securing cloud isn't just about your environments. The challenge is maintaining the security of your data whilst providing greater control and transparency.

### Ensuring your cloud environment complies with regulatory requirements
With complex regulatory requirements, ensuring your platform, data and controls remain compliant is a concern for anyone using cloud.

Delivering complex migrations with less risk

Our cloud specialists are enterprise natives with expertise gained from working with some of the UK's largest businesses and financial organisations. This means they understand the governance and compliance frameworks that enterprises operate within. The result is the delivery of complex, large-scale migrations with less risk and greater transparency. Our team will work with you in the design and delivery of the right cloud security controls, technologies, automation and orchestration to accelerate adoption and secure your cloud infrastructure, data and applications.

Why ECS is the partner for you:

ECS enables enterprises to secure by design, providing the technology controls and processes to ensure the security of their cloud infrastructure. We help organisations accelerate enablement whilst reducing the time spent on compliance. Our approach is underpinned by our innovative Delivery Pods™ methodology, meaning your teams can more effectively and consistently respond to security and compliance threats.

WE IMPLEMENT. WE SECURE. WE OPTIMISE. YOU SUCCEED.

Accelerated adoption with minimum risk

We understand that accelerating your cloud adoption with minimal risk is a key priority. We help you quickly assess and develop a route to secure your infrastructure, data and applications so you can accelerate adoption securely.

Improved security posture

With the addition of automation and new tooling and technologies, you get an unprecedented level of visibility and control over your environment. This enables you to more rapidly and consistently respond to security events and improve your security posture.

Security embedded within your processes

With your cloud foundations established and secured, we work with you to protect your deployments and accelerate application delivery – embedding security into your continuous integration pipelines.

Regulatory compliance

We know that security extends beyond your cloud environment. ECS works with you to ensure you meet your existing data protection obligations. Our deep knowledge and understanding of cloud security ensures that new or existing cloud environments are secured according to industry best practice and meet the strictest regulatory requirements.

Why we're different

Our consultants deliver cloud, customer experience transformation, continuous improvement and engineering capabilities in one team. This means you get process, engineering and best of breed technology to deliver better customer experiences. Our experience working with some of the largest and most heavily regulated businesses in the UK to accelerate their customer journey transformation also means we put compliance and security at the heart of every solution.
