

AWS Well Architected Review.

Want to increase the business value delivered by your cloud solution?

The Well Architected Review is an architectural assessment based upon the AWS Well Architected Framework, providing a health check of your cloud services. The objective is to provide you with a detailed 1:1 consultation and recommendations to meet best practices, and help you make an informed decision to increase the business value delivered by your preferred cloud solution.

What's more, the Well Architected Review is free, and you could be eligible for up to \$5,000 credit from AWS.

The 5 Pillars of the Well Architected Framework

1. Operational Excellence

Gain the ability to run and monitor your systems so they deliver business value and continually improve supporting processes and procedures.

2. Reliability

Enable your system to recover from infrastructure or service disruptions, dynamically acquire computing resources to meet demand, and mitigate disruptions such as misconfigurations or transient network issues.

3. Cost Optimisation

Run systems so they deliver business value at the lowest price point.

4. Security

Protect information, systems, and assets while delivering business value through risk assessments and mitigation strategies.

5. Performance Efficiency

Learn how to use computing resources efficiently to meet system requirements and maintain that efficiency as demand changes and technologies evolve.

Why work with ECS?

ECS is known in the industry for delivering first-class solutions that leverage our knowledge of best practices as well as industry wide legislations. This experience makes us best suited for crafting hassle free solutions – and has helped us best serve our customers for over a decade.

Our recognition with AWS as an Advanced AWS Partner means we work inseparably with AWS providing a peak level of service at a standout velocity. We incorporate the best Architects and Solvers who translate customer aspirations accurately right from the go, helping to accelerate the realisation of business-inspired initiatives onto the AWS platform.

How it works:

Prepare (½ day)

Identify the workload to be reviewed and the stakeholders from customer side

Execute (½ day)

Conduct a free review using the AWS Well Architected Framework

Report (2 day)

Create a detailed report aligned to AWS best practices. This will cover improvements needed and how these can be resolved over the next 3 months, as well as high risk issues that need to be resolved within the next 30 days. This report will be discussed with you and next steps agreed

Remediate

The report categorises items to help prioritise remediation. If the customer chooses ECS to support them resolve the issues identified, they are eligible for up to \$5,000 credit from AWS

Benefits derived from the Well Architected Review

- Understand and reduce risk associated to your cloud solution,
- Reduce operational costs,
- Minimise system failures,
- Identify and fix security gaps,
- Maintain operational efficiency,
- The review is free, so what do you have to lose?

Identify, address and increase the business value delivered by your cloud solutions in as little as three months.
